CJRP 1060 RADIO PROVINCIALE

Quebec, January 14 1970

Mr. S. R. Morss
R - 3 Bradford
Mass.
U.S.A. 01830

Dear Sir:

It was a pleasure to have received your letter regarding your CJRP reception report.

According to our station logs your description and air schedule correspond exactly, for which we offer you our compliments.

Our transmitter is a Gates B C 10P, 10,000 watts. We operate 24 on-air hours per day on a directional radiation pattern towards north-east.

Our frequency of course is 1060Kcs, and our towers are located in St-Nicholas Station, about 10 miles from our studios; we have three 250 feet towers with bases located 300 feet above sea level.

Hoping that you find this information to your complete satisfaction, we look forward to your Quebec City visit.

Sincerely,

Norman Knight
